(a)
energy distance vs dispersion
energy distance to real
θ̂ = 1.31
NB dispersion θ (log; ∞ =Poisson)
(b)
expressed signed r_{var}
signed r_{var} (expressed)
θ̂ = 1.31
calibrated = 1.00
NB dispersion θ (log)
(c)
Median difference
(NB − Poisson)
50 datasets, ranked by median effect
